Reviewer's Comment / Report

The manuscript presents an in-depth exploration of a highly relevant and timely topic. The writing is clear, and the logical flow of the study allows the reader to easily follow the progression from the problem statement to the conclusions drawn. The research question is clearly defined and well-supported by a comprehensive literature review, which positions the study effectively within the existing body of knowledge.

The methodology is robust, with clear explanations of the research design and data collection techniques. The data analysis is both rigorous and thorough, with appropriate statistical techniques applied where necessary. The results are clearly presented, and the discussion of the findings is thoughtful and well-rounded, taking into account both the strengths and limitations of the study.
