### Reviewer's Comment for Publication.

*(To be published with the manuscript in the journal)*

*The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be displayed in the journal publication alongside with the reviewers name.*

Following observation needs to be incorporated:

- Major restructuring of the paper is required as there seems to be loss of interconnection as one moves from one section to another.
- Major grammatical errors are there as the author has used multiple tense cases within paragraphs.
- The conclusion of the paper seems to be open ended; the author should voice their personal point of view within this part.
- The certain reports that are highlighted within the paper need to be summarized or discussed on what and how they have contributed to the broader topic and what the author has derived from those.

## REVIEWER'S REPORT

### *Detailed Reviewer's Report*

- Reconstruction of paragraphs is required as there are significant paragraph breaks which make the reader disassociated with the content.
- A proper referencing guideline needs to be followed as prescribed by the journal.
- As stated by the author through this statement, 'As indirect sources, this study encompasses a wide array of materials such as governmental 69 reports, *academic literature*, and *media facts that could contribute toward context and background 70 accounts*'; this needs to be highlighted in further in the analysis part how these were incorporated within their research. This seems to be lacking in the research.
- The author should first establish the inter-relationship between environmentalism and feminism through literature findings and case examples then they should move further.
- Since this paper is literature based the author should established the various works of researchers within this field that have highlighted or contributed in the topic. This data can be formed in a matrix that might show a certain timeline.
- The reference in the list doesn't seem to be highlighted with the paper; it needs to be done as per the format.
- Restructuring of the paper is required as per the content as in the current state the sections seem to overlap one another.
