### Reviewer's Comment / Report

#### Abstract:

The abstract effectively introduces the central theme of the paper, highlighting the intersection of decolonial and feminist perspectives within Brazil's environmental and climate change policies. It succinctly presents the hypothesis that feminist influences are increasingly shaping public policy and sets the stage for an empirical exploration of Brazilian ecofeminism. The abstract is clear, concise, and well-structured, aligning with the academic standards for research presentations.

#### Keywords:

The chosen keywords accurately reflect the study's core themes and enhance its searchability in academic databases. They are relevant and appropriate for the research focus.

#### Introduction:

The introduction provides a well-contextualized background to the study, outlining the recent political shifts in Brazil and their implications for climate and environmental policy. It clearly situates the research within a contemporary political landscape, emphasizing the role of women, particularly Marina Silva, in driving policy changes. The discussion of the contrast between the current administration and its

## REVIEWER'S REPORT

predecessor is effectively presented and substantiated with political and institutional evidence. The transition to the research aims is smooth and logical, reinforcing the study's significance.

### Methodology:

The study employs a qualitative research approach, which is appropriate for analyzing gender dynamics in decision-making. The inclusion of both direct and indirect sources strengthens the study's depth and reliability. The categorization of key actors (Politicians, Governmental Agents, Civil Society Activists, Scientists, and Entrepreneurs) ensures a comprehensive examination of the subject matter. The methodological framework is clearly defined and systematically structured, enhancing the study's credibility and applicability.

### Analytical Framework:

The adoption of a decolonial perspective as the guiding analytical framework is well-justified. The argument that decolonial views provide intellectual autonomy and challenge Eurocentric analyses is compelling and well-supported by literature. The inclusion of references to ZERAI, MUPAWOSE & MOONSAMY (2023) strengthens the theoretical grounding of the study, reinforcing the necessity of contextualized knowledge production.

### Use of Sources:

The study integrates a diverse range of sources, including governmental reports, academic literature, and media accounts, which contribute to a well-rounded examination of the topic. The combination of primary and secondary sources enhances the research's robustness and provides a multi-perspective analysis.

### Clarity and Coherence:

The paper is well-organized, with clear transitions between sections and logically structured arguments. The writing style is formal and academic, appropriate for the subject matter. Concepts are articulated with precision, ensuring accessibility for a broad academic audience.

### Conclusion:

Although not explicitly stated in the provided text, the research seems to aim at drawing conclusions regarding the impact of feminist and decolonial perspectives on Brazil's environmental policies. Given the strong theoretical foundation and methodological rigor, the conclusions are expected to be well-supported and insightful.

### Overall Assessment:

This study presents a timely and relevant analysis of the interplay between feminism, decolonization, and environmental policy in Brazil. The research is well-conceptualized, methodologically sound, and theoretically grounded. It provides valuable insights into contemporary policy-making and contributes to broader discussions on feminist and decolonial influences in governance and sustainability. The study is positioned as an important contribution to the field of environmental politics and feminist studies in Latin America.
