Reviewer's Comment / Report

Overall Assessment: This case report presents a well-structured and informative account of a heterotopic pregnancy, an uncommon yet clinically significant condition. The paper effectively details the clinical presentation, diagnostic approach, and surgical management, while also highlighting the favorable maternal and fetal outcomes. The report is clear, concise, and well-supported by relevant literature, making it a valuable contribution to the documentation of heterotopic pregnancies.

Strengths:

- Clear Abstract and Introduction:** The abstract provides a succinct summary of the case, including incidence, challenges in diagnosis, and management strategies. The introduction appropriately contextualizes the case within existing literature and historical references.
- Detailed Case Description:** The report presents a well-organized chronological account of the patient's clinical presentation, examination findings, diagnostic imaging, laboratory results, surgical intervention, and postoperative care.
- Use of Supporting Evidence:** The inclusion of ultrasound findings and intraoperative observations adds depth and credibility to the case report.

REVIEWER'S REPORT

4. **Concise Discussion and Conclusion:** The discussion effectively synthesizes relevant information, emphasizing the importance of early diagnosis and appropriate intervention. The conclusion reinforces key points regarding the management of heterotopic pregnancy.

Figures and Pathological Findings: The inclusion of ultrasound images and intraoperative findings strengthens the clinical evidence presented. The confirmation of the ectopic pregnancy through pathological examination further validates the diagnosis and surgical decision-making.

Final Remarks: This case report is a well-documented and informative piece that effectively highlights the challenges and management of heterotopic pregnancy. The structured presentation, clarity of information, and emphasis on clinical decision-making contribute to its value in medical literature.

No suggestions for improvement are required, as the report is comprehensive and well-articulated.
