### *Reviewer's Comment / Report*

**General Overview:** The case report presents a well-structured and clinically significant discussion on ruptured interstitial ectopic pregnancy, emphasizing the rarity and life-threatening nature of the condition. The paper provides an informative and methodical approach to the case, detailing the patient's history, diagnostic findings, management strategies, and surgical intervention.

**Strengths:**

1. **Clarity and Precision:** The paper clearly outlines the definition of cornual ectopic pregnancy, its risks, and the necessity for early diagnosis and management.
2. **Clinical Relevance:** The report is highly relevant to obstetricians, gynecologists, and emergency healthcare providers, offering valuable insights into a rare but serious medical condition.
3. **Structured Presentation:** The case is presented in a logical sequence, ensuring ease of understanding.
4. **Multidisciplinary Approach:** The discussion on the involvement of different medical teams highlights the importance of collaborative decision-making in managing complex cases.

## REVIEWER'S REPORT

5. **Surgical Management Description:** The detailed account of laparoscopic intervention, intraoperative findings, and postoperative care provides a comprehensive understanding of the surgical approach to managing ruptured cornual ectopic pregnancy.

### Areas of Excellence:

- The case selection effectively illustrates the diagnostic and therapeutic challenges of interstitial ectopic pregnancy.
- The inclusion of laboratory and radiological findings supports the clinical decision-making process.
- The discussion integrates literature references to provide context for the case and validate management decisions.
- The emphasis on patient counseling and informed consent before surgery is commendable.

**Conclusion:** This case report successfully highlights the time-sensitive nature of ruptured interstitial ectopic pregnancy and underscores the necessity of prompt surgical intervention. The structured approach and multidisciplinary involvement make it a valuable contribution to the field of obstetrics and gynecology. The report is well-prepared, clinically informative, and serves as an excellent reference for medical practitioners dealing with similar cases.
