Reviewer's Comment for Publication.

(To be published with the manuscript in the journal)

The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.

This study provides a comprehensive evaluation of composting methods, contributing valuable insights into compost maturity and quality. The inclusion of multiple composting techniques and their impact on physical, chemical, and biological parameters strengthens its applicability in sustainable agriculture. The findings can aid in optimizing composting strategies for improved soil health and crop yield.

Detailed Reviewer's Report

I appreciate the opportunity to review your manuscript on the influence of composting methods on compost maturity and quality. The study is well-structured and provides useful insights into composting techniques. However, to enhance clarity and improve the quality of the paper, I recommend a major revision. Below are my detailed comments and suggestions for improvement:
