

## REVIEWER'S REPORT

Manuscript No.: IJAR-51505

Date: 9/5/2025

### Title:

**D-Aspartic Acid In The Human Brain Tissue: A Luminous Theory**

### Recommendation:

Accept as it is .....

**Accept after minor revision**.....

Accept after major revision .....

Do not accept (*Reasons below*) .....

Rating	Excel.	Good	Fair	Poor
Originality		Good		
Techn. Quality		Good		
Clarity		Good		
Significance		Good		

Reviewer Name: Dr.Sumathi

**Date:** 9/5/2025

### Reviewer's Comment for Publication.

*(To be published with the manuscript in the journal)*

*The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.*

Luminous theory generally refers to the study of light and its various aspects, including how it is emitted, measured, and perceived by human eye.

## Detailed Reviewer's Report

- 1. Human brain tissue is the soft, gel like substance that makes up the brain, and its primarily composed of two main types of cells neurons and glial cells.**
- 2. Neurons are responsible for transmitting electrical and chemical signals, while glial cells support and protect the neurons. The brain also contains blood vessels and other structural elements.**

## **REVIEWER'S REPORT**

- 3. D- aspartic acid is a non essential amino acid that exists in both L and D forms.**
- 4. Mental illness refers to a broad range of diagnosable mental, behavioral or emotional disorders that can interfere with a persons ability to live, work, learn, and participate in their community.**
- 5. These conditions affect thinking, feeling, mood, and behavior, impacting daily life and relationships.**
- 6. Flow charts of significant points can be add in review part.**
- 7. Techniques used good and clear.**
- 8. Some relevant pictures can be added in review parts.**
- 9. Summary parts must be included.**
- 10. References should be in alphabetical order.**
