Reviewer's Comment for Publication.

(To be published with the manuscript in the journal)

The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.

Cervical cancer is a disease where cells in the cervix, the lower part of the uterus, grow uncontrollably and form a tumor.

Detailed Reviewer's Report

- 1. Perception is the process of interpreting sensory information, like sights, sounds and smells, and making sense of the world around us.**
- 2. Awareness, in simple terms, is the state of being aware or having knowledge of something.**
- 3. It is the ability to perceive or understand that something exists or is happening.**

REVIEWER'S REPORT

- 4. The acceptance of the cervical cancer vaccine varies widely, with studies reporting high acceptance rates in some groups, while show lower acceptance.**
- 5. Several factors influence this, including parental acceptance of vaccinating their daughters, knowledge about HPV and cervical cancer and perceptions of the vaccine's safety and effectiveness.**
- 6. Key words must be included.**
- 7. References are given very less. Need to add more with referring recent publications.**
- 8. In results part should be with results and tables.**
- 9. Summary part can be included.**
- 10. This research review is medically very valued and can be continued to explore more about this research topics.**
- 11. After minor corrections eligible to publish in your journal.**
