STORYNOMIC TOURISM: A KEY TO REVITALIZING CULTURAL AND HISTORICAL MARKETING STRATEGIS

4 Abstract : This study aims to promote cultural and historical heritage-based tourism marketing strategies, study case in 5 Klungkung - Bali through a Storynomic Tourism approach. The method used is qulitative method, which combines 6 qualitative and quantitative analysis with SWOT analysis and the analytic hierarchy process (AHP). The results of the 7 analysis show that the effectiveness of the marketing strategy includes cooperation and collaboration between various 8 interests, namely stakeholders and local communities, then infrastructure improvements are needed, utilizing information 9 technology for the purpose of promotion and marketing and the development of tourist destinations, then there are 10 educational programs that are able to increase public awareness and tourists. The novelty of this research is Storynomic 11 Tourism as a potential marketing strategy for cultural tourism. The locations of this study case are Gelgel Village, Kamasan 12 Village, and Semarapura Cultural City which are important centers in the history of Klungkung. This research is expected to 13 make a significant contribution to the development of more effective and sustainable marketing strategies, as well as 14 enhance the appeal of Klungkung Regency as a worthy tourist destination. 15

16 **Keywords** : Storynomic, Cultural Tourism, Marketing Strategy.

19 1. Introduction

1

2 3

17 18

20 The tourism industry has undergone very significant changes in recent years, shifting from mass tourism to more exclusive 21 and personalized travel experiences (Moscardo, 2020) As travelers want deeper engagement and more interactive 22 experiences, the role of storytelling is becoming increasingly important in tourism marketing and destination promotion 23 (Gravili et al., 2017) Tourism that harnesses the power of storytelling to promote tourist destinations rooted in local history 24 and culture has emerged as a promising strategy for tourism entrepreneurs (Bassano et al., 2019). Previous research has 25 proven that the presentation of narrative stories in museums and tourist attractions is able to improve the experience of 26 tourists (Galih Kusumah & Andrianto, 2023). This is where Storynomic comes in, as it is able to close the divide between 27 the locals and the travellers and provide experience that is otherwise difficult to attain using comprehensive and 28 conventional tourism methods. (Gonçalves & Silva, 2018). Tourism Marketing in Europe, the strategy of cultural 29 storytelling has been established, where many destinations are leveraging the culture and heritage of their area to attract 30 visitors (Galih Kusumah & Andrianto, 2023). Similarly, in Asia, in recent years, story-telling has become an important 31 approach as a promotion strategy for cultural tourism experiences, enabling destinations to position themselves and 32 establish closer ties with tourists. (Moin et al., 2020). Indonesia's diverse cultural landscape, with its many ethnic groups, 33 traditional practices, and amazing natural potential, provides many storytelling opportunities that can be effectively 34 utilized to attract and engage tourists (Galih Kusumah & Andrianto, 2023). Tourism based on stories and utilizing 35 narratives in marketing and promoting destinations based on history and culture, emerges as a promising strategy for 36 marketers and management of tourist destinations. (Bassano et al., 2019). In marketing a tourist object, you can also 37 collaborate with influencers to promote vacation destinations. Moreover, encouraging influencers to involve their 38 followers in content creation (ex, hashtag campaigns) can further leverage the positive impact of e-WOM and the expected 39 social return on the intention to visit a destination (Soares et al., 2025)

40

41 In this study, Klungkung Regency was chosen as a Regency that has several Tourism Villages with cultural and historical 42 attractions as a concept of tourism products that can be offered to tourists. This regency has a deep and unique position in 43 history on the island of Bali, namely as the center of Royal dynasty in Bali. (Dwipayana & Sartini, 2023). Klungkung's rich 44 cultural heritage is intrinsically linked to its role as a center of government and spiritual significance, making it an 45 important center for understanding the deep-rooted Balinese traditions and their enduring influence on the island's 46 tourism industry (Mahendra et al., 2019) In Klungkung Regency, there are several Tourism Villages that have cultural 47 potential, and historical values that are different from others. The villages are Gelgel Village, Kamasan Village, and 48 Semarapura. Klungkung Regency has a very strong cultural history. Gelgel Village is a village in a strategic historical and 49 cultural area, where its historical and cultural values can be introduced and then can become an attraction for foreign and 50 domestic tourists. Klungkung Regency has the potential to be redeveloped cultural tourism potential in several villages that 51 are interrelated with the value of their historical and cultural heritage such as Gelgel Village, Kamasan Village and 52 Semarapura which are famous for Kerta Gosa which is a heritage tourism object of the Klungkung Kingdom with the 53 presence of physical artifacts of the castle from the Klungkung Kingdom. The connection between Gelgel Village, then 54 there is evidence of relics from the Gelgel kingdom in Kamasan Village in the form of archaeological evidence such as stone 55 thrones, stone mortars, stone machetes, menhir statues, dakon stones, cylindrical monoliths, road passages covered with

river stones found in 1976 and 1977, and spread across Kamasan villages and its surroundings. So that it gives a clue that the community is quite old. From the historical linkages found in Klungkung Regency, especially starting from the Glory of the Gelgel Kingdom, then Kamasan Village and after the collapse of the Gelgel kingdom then the dynasty established a kingdom in Semarapura known as the King of Klungkung with evidence of physical artifacts that are museum in the Kerta Gosa museum.

61

99

62 Architectural wonders in the past of Klungkung Regency, such as the Kertha Gosha Assembly Hall, are able to be a real 63 reminder of the past history in the district (Kurnia Widianti & Bambang Studyanto, 2018). The Kertha Gosa building is 64 preserved to this day and used with great care, giving tourists a glimpse into the magnificent history of the area and the 65 cultural values contained within it and shaping its development. The area in Klungkung Regency is famous for its 66 concentration of traditions, religious practices and cultural expressions that are very strong and rooted in the philosophy of 67 Tri Bhuwana or "Three Worlds" which includes the realms of physical, mental and transcendental existence. This holistic 68 view of life is able to shape not only the daily life of the people of Klungkung but also become a driving force for the 69 development of Bali's tourism industry which relies heavily on unique cultural offerings (Astuti, 2018). Besides being 70 famous for its history and culture, Klungkung Regency also has unique handicrafts such as woven fabrics, puppet paintings, 71 uang kepeng, bullet casing carvings in Kamasan Village, woven fabric crafts in Gelgel Village and others. Currently, the 72 cultural potential found in Klungkung Regency in tourism development is still lacking compared to the tourism potential in 73 Nusa Penida District which is well developed and the number of tourist visits exceeds other regions or destinations in 74 Klungkung Regency. Problems that occur in the development of tourist destinations such as the potential of culture, 75 history, economy, natural resources owned by each tourism village have not been optimally utilized by the village 76 community, then the promotion and marketing related to tourism potential have not been optimal, the existing potential 77 has not been well organized to be used as a tourist attraction, and the tourism management system has not been 78 synergized between stakeholders and related agencies (Kadek Wira Adi Putra et al., 2019). To realize effective tourism 79 development, efforts are needed to diversify tourist attractions that are oriented towards improving community welfare, 80 preserving cultural arts, and developing environmentally friendly tourism (Carvache-Franco et al., 2020). Strategic 81 investments in infrastructure, marketing, and service quality can enhance tourism performance, particularly when a 82 favourable economic environment is supported. (Cavus et al., 2025). One of the tourism destinations that has the potential 83 in the form of historical, artistic and cultural relics is the tourist villages in Klungkung Regency. 84

85 Klungkung Regency offers a unique opportunity to utilize storytelling tourism as a marketing strategy through its historical 86 and cultural meaning. Variables that need to be considered include the role of local communities and their active 87 involvement in the storynomic process (Yamagishi et al., 2020). In the context of Klungkung Regency, the integration of 88 these factors has the potential to make a significant contribution to the successful implementation of storynomic tourism 89 as a strategic marketing strategy. Sustainable tourism development by considering environmental, social, and economic 90 aspects and balancing them is an important thing that must be considered (Fadli et al., 2022). By utilizing immersive digital 91 experiences such as virtual reality or augmented reality technology, it has the potential to bring visitors to more deeply 92 explore the core of the narrative of stories related to the history and culture of an area, so as to be able to create a more 93 interesting and unforgettable experience. (Herman et al., 2023). The success of tourist destination managers who have a 94 story theme requires collaborative efforts between stakeholders in a tourist destination such as local communities, 95 destination management institutions, tourism operators. (Gonçalves & Silva, 2018). By harnessing the power of 96 storytelling, it is able to support the involvement of local communities, then utilize digital technology, and design 97 immersive experiences. Tourist destinations are able to position themselves as sustainable historical and cultural-based 98 destinations (Kartika & Riana, 2020).

100 With the existence of historical stories in the past, Klungkung Regency can promote its tourism destinations through story 101 narratives in the form of storynomic tourism to increase tourist visits to Klungkung Regency as part of the development of 102 the Historical Tourism Village, then take advantage of the proximity to other tourist attractions to be able to make tour 103 packages. The tour package can start from Gelgel Village, then Kerta Gosa and finally Kamasan Village, where Kamasan 104 Village has historical value as the forerunner of the development of traditional painting in Bali, as well as puppet paintings, 105 silver crafts and a clean and well-organized environment. The number of painting craftsmen and silver, brass and gold 106 craftsmen was recorded as many as 143 people out of the total population of Kamasan Village of 3,073 people. In the 107 application of the concept of Storynomic tourism, it is hoped that not only will they be able to understand the tourist 108 object, but tourists will also be able to give their appreciation. Storynomic Tourism applied through digital platforms can 109 also be made in the form of articles, personal blogs and other social media. This is accompanied by the development of

- 110 digital media which is rapidly increasing both in Indonesia and in the world, so that it is able to make the media as a 111 dissemination of information related to tourist destinations through storynomic tourism.
- 112 113 **2.** Literature Review

114 2.1 Experiential marketing

115 According to (Schmitt, 1999) experiential marketing is a way to make customers create experiences through the five senses

- (sense), create affective experiences (feel), create creative thinking experiences (think), create customer experiences that are related to the body physically, with behavior and lifestyle, as well as with experiences as a result of interaction with others (act), as well as create experiences that are connected to social circumstances. lifestyle, and culture that can reflect
- 119 the brand which is the development of sensations, feelings, cognitions, and actions (relate)

120

121 **2.2** Storynomic Tourism

122 This research uses the theory of storynomics, according to Robert McKee and Thomas Gerace (McKee & Gerace, 2018), in 123 their book entitled Storynomics Story-Driven Marketing in the Post-Advertising World, that in these days traditional 124 advertising and promotion, are starting to lose their effectiveness. The stories conveyed in these advertisements and 125 promotions must be engaging, authentic, valuable, emotionally so that they can build stronger relationships with 126 consumers and be able to increase sales. By making a good story narrative, the marketing process becomes something 127 different, and the story will have economic value and attract someone to make a decision in a purchase. (McKee, 2018) 128 From the uniqueness of the concept of making a story narrative, it will be an added value for Klungkung Regency. The 129 historical and cultural variables that shape the effectiveness of storynomic tourism as a historical and cultural-based 130 tourism marketing strategy are complex and multidimensional (Kartika & Riana, 2020) the following are the variables of 131 storinomic tourism as a historical and cultural-based marketing strategy.

- 132
- 133
- 134

Table 1. Variables of Storynomic Tourism as a Marketing Strategy

No.	Variable	Storynomic Tourism as a marketing strategy	Previous research
1	Partnerships and Cooperation	Success in the implementation of story-themed tourism in a destination requires collaborative efforts between stakeholders, including local communities, tourism operators, and destination management agencies	(Gonçalves & Silva, 2018)
		The use of digital experiences has the potential to bring visitors deeper through the historical and cultural narrative of an area, so that it is able to create a more interesting and unforgettable experience	(Herman et al., 2023)
2	Technology	A conceptual framework indicating that national culture of the web users influences their web communication behaviors, specifically information search behavior, communication behavior, and transaction behavior	(Park, 2012)
3	Boosting economic	Storynomic tourism is used in tourism marketing to improve the economic conditions of rural areas by utilizing the uniqueness of culture and history	(Rero & Milyardo, 2022)
	growth	<i>Storynomic</i> , a term that has gained increasing attention in recent years, refers to the intricate interaction between narrative structures and economic systems	(Parani et al., 2024)
4	Human Resources	The role of local communities and their active involvement in the storynomic process	(Yamagishi et al., 2020)
5	History and Culture	By incorporating story indicators into marketing strategies, cultural heritage tourism destinations can effectively harness the power of <i>storytelling</i> to attract and engage visitors	(Parani et al., 2024)
6	Infrastructure	An important infrastructure in story tourism is the availability and accessibility of historical and cultural assets within the destination. These assets, which can include landmarks, museums, and cultural events, serve as the foundation for narratives woven into the tourism experience	(Alhadad & Meparishvili, 2019)

- 136 The research gap in this study lies in the limited exploration of how storynomic tourism as a strategic approach, which can
- 137 be applied effectively to promote and market historical and cultural-based tourism in Klungkung Regency. While previous 138
- studies have highlighted the importance of storytelling in historical and cultural tourism. Further research is still needed 139 related to the specific strategies and challenges involved in harnessing the power of narrative in marketing historical and
- 140
- cultural assets in Klungkung Regency. This research gap provides an opportunity to provide insights and can guide local 141 tourism authorities and stakeholders in developing and implementing storynomic tourism initiatives to improve the tourist
- 142 experience and contribute to the preservation of Klungkung's cultural heritage.
- 143
- 144 Various tourist areas can also take advantage of their cultural and historical heritage, such as local handicrafts, customs, 145 and recorded historical sites to create unforgettable memories for visitors. (Foo & Krishnapillai, 2019) However, the 146 interest of tourists is shifting from mere physical scenery to intangible cultural experiences, which opens up new
- 147 opportunities and new challenges for the promotion and marketing of tourism destinations (Nwokorie & Chigozie, 2015). 148
- Storynomic tourism can be a marketing strategy for historical and cultural-based tourism, and it can be a powerful tool to 149 engage and attract visitors by immersing them in the rich narrative and cultural experience of a destination.
- 150

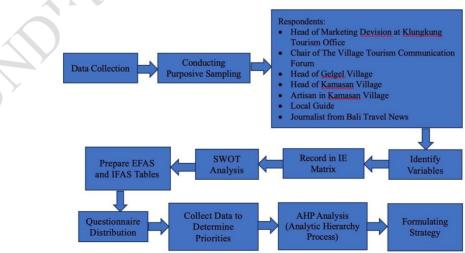

151 3. Methodology

152 3.1 SWOT, IFE EFE, IE Matrix

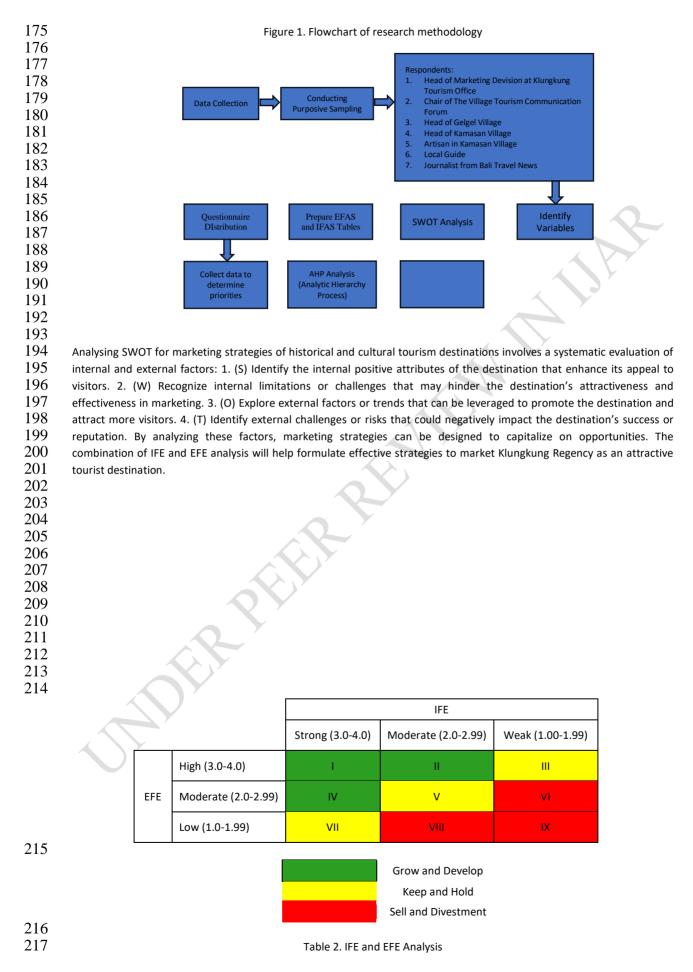

153 The approach used in this study is a qualitative method, to analyze historical and cultural tourism marketing strategies 154 using internal factor evaluation (IFE), external factor evaluation (EFE), IE Matrix, SWOT (David, Fred R & David, 2017), and 155 AHP (analytical hierarchy process) in Klungkung Regency, then collect data for the preparation aspects obtained through 156 interviews and observations. The location of the research is in Klungkung Regency with representatives of three Tourist 157 Destinations represented by Gelgel Village, Kamasan Village and Semarapura City. The three tourist destinations have their 158 own uniqueness in the form of cultural potential that can be developed and promoted through a story narrative approach 159 or what is called storynomic tourism. The flow of SWOT analysis in this research is as follows: (1) Data Collection: Sampling 160 data using purposive sampling techniques. The selected resource include: Head of marketing division at the Klungkung 161 Regency Tourism Office, Chairman of the Tourism Village Communication Forum in Klungkung Regency, Head of Gelgel 162 Village, Head of Kamasan Village, Craftsmen in Kamasan Village, local guides, Journalists from the mass media Bali Travel 163 News. (2) Variable Identification: All variables relevant to the research are organized and recorded in the IE (Internal-164 External Matrix) matrix. (3) SWOT analysis.

165

166 Conduct a SWOT analysis by paying attention to: Strengths, which is to identify existing strengths, such as the potential for 167 rich historical stories and cultural diversity, Weaknesses for example lack of promotion, Opportunities is to analyse such as 168 increasing tourist interest in culture-based tourism, Threats is to assess threats that may arise. (4) Questionnaire 169 Distribution: After the SWOT analysis, the questionnaire is distributed to each predetermined resource person. This 170 questionnaire aims to collect further data and determine priorities in strategy development. (5) AHP Analysis: Conduct 171 analysis using the AHP method to evaluate and prioritize the factors that have been identified. By following this flow, a 172 SWOT analysis can provide a clear picture of the potential and challenges of storynomic tourism in Klungkung Regency, as

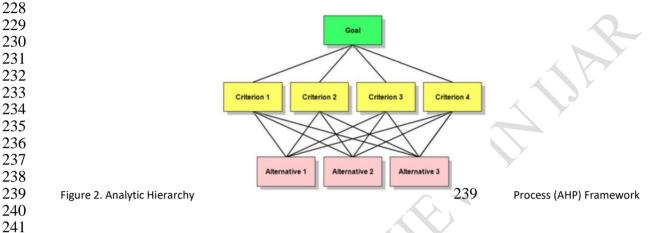

173 well as help in formulating an effective marketing strategy.

219 3.2 AHP Framework

220 AHP is a decision support model developed by Thomas L. Saaty. This decision support model will outline a complex multi-221 factor or multi-criteria problem into a hierarchy, according to (Saaty, 1993), With hierarchy, a complex problem can be 222 decomposed into its groups which are then arranged into a form of hierarchy so that the problem will appear more 223 structured and systematic. AHP for storynomic tourism as a marketing strategy for historical and cultural tourism 224 destinations such as : (1) Define the Objective (2) Identify Criteria (3) Structure the Hierarchy (4) Conduct Pairwise 225 Comparisons (5) Calculate Weights (6) Synthesize Results (7) Consistency Check (8) Make Decisions. By using AHP, 226 decision-makers can systematically evaluate and prioritize storynomic tourism strategies, ensuring a well-informed 227 approach to marketing the destination.

242 4. Results And Discussion

243 The location of the research is in Klungkung Regency with representatives of three Tourist Destinations represented by 244 Gelgel Village, Kamasan Village and Semarapura City. The three tourist destinations have their own uniqueness in the form 245 of cultural potential that can be promoted through a story narrative approach. Gelgel Village was once the center of the 246 ruling Kingdom of Bali from the beginning of the 16th century until 1686, the buildings that still exist are in the form of a 247 place of worship that is a relic of the Kingdom of Bali, Jero Agung Temple which still has its former palace and there is also 248 a Basic Temple located to the east of Jero Agung Temple. Then there is also the oldest Islamic village in Bali where Muslims 249 and Hindus live side by side, which is marked by the carving of the mosque door as an alcuturation of Islamic and Hindu 250 culture, the next potential is in the form of endek and songket woven cloth crafts. The next Tourism Village that is also the 251 object of research in representing Klungkung Regency is Kamasan Village, where this village has historical value because it 252 is the forerunner of the development of traditional painting in Bali whose existence still exists.

254 Kamasan Village is very closely related to the history of the Kings of Bali in ancient times which can be found in an 255 inscription. The archaeological evidence found in the form of stone thrones, menhir statues, stone mortars, stone 256 machetes, cylindrical monoliths, dakon stones, road passages covered with river stones that were found in 1976 and 1977, 257 scattered in Kamasan village and its surroundings give clues that the community is quite old. The archaeological findings 258 also hint that the megalithic tradition once colored the life of the community in Kamasan and its surroundings, namely the 259 life of the pre-Hindu community which was rooted in the Neolithic period (± 2000 BC). The Megalithic tradition has been 260 absorbed by the undagi and pande-an in the later period. The Pande were increasingly known and functioned by the King 261 (Ida Dalem) since the kingdom was centered in Gelgel (1380-1651). At the peak of the fame of the Gelgel kingdom, the 262 golden Kamasan is also known as a village of craftsmen, such as painting and carving. The next tourist destination is 263 Semarapura City which has a historical connection from the Gelgel kingdom which became the initial milestone of the 264 establishment of the Klungkung kingdom in 1686 which was the successor of the Gelgel Dynasty, then a historical event 265 called Puputan Klungkung occurred, until the change of Klungkung City to Semarapura City in 1992. The famous and 266 featured tourist attractions in Semarapura City are Kertha Gosa (bale kambang, Pemedal Agung and Semarajaya Museum), 267 Puputan Klungkung Monument, and Puri Agung Klungkung.

268

253

269 4.1 A Timeline Of History And Culture In Klungkung

Timeline of history and culture serves as a key element of storynomic tourism, which emphasizes the narrative and storytelling aspects of a destination. This timeline not only enriches the visitor experience but also helps to create a deeper emotional connection between tourists and the destination. Additionally, it supports marketing strategies by providing

- 273 compelling stories that can attract potential visitors, enhance brand identity, and differentiate the destination in a 274 competitive tourism market. Below is a timeline of history from era to era.
- 275 1. 1350 AD 1380 AD
- Arya Kuthawaringin, a descendant of Shri Airlangga, was appointed as the ruler of the Gelgel region, building the palace "Puri Jero Agung" and the Pura Dalem Tugu. In 1350, the Maharaja of Majapahit appointed Shri Aji Kresna Ketut Kepakisan as the Duke of Bali, with Arya as the Adi Patih. After the death of Shri Aji Kresna in 1380, Shri Agra Samprangan succeeded him but failed. Kyayi Klapodyana then requested Dalem Ketut Ngulesir to take over in order to save Majapahit's power in Bali.
- 281 2. 1383 AD (The first king until the transfer of power)
- In the year 1380 AD, Ida Dalem Ketut Ngulesir ruled from the Gelgel throne with the title Shri Aji Semara Kepakisan,
 after Kyayi Klapodyana built a new palace called "Puri Jero Agung." The capital of the government was moved from
 Samprangan to Gelgel, attracting royal officials to follow, thus positioning Gelgel as a rapidly developing center of the
 kingdom.
- $286 \qquad \text{3.} \qquad \text{1460}-\text{1550 AD} \text{ (The Golden age of The Gelgel Kingdom)}$
- 287The Golden Age of Gelgel occurred under the reign of Ida Dalem Waturenggong (1460-1550 AD), who implemented288government reforms and expanded power to East Java, Lombok, and Sumbawa.
- $289 \qquad \text{4.} \qquad \text{1550}-\text{1580 AD} \text{ (The Decline of The Golden Age og Gelgel Kingdom)}$
- 290The golden age of Gelgel began to fade during the reign of Dalem Bekung (1550-1580 AD) with the emergence of
rebellions from Patih Kyayi Batanjeruk and I Dewa Anggungan, as well as the rebellion of Krian Pande Basha
- 292 5. 1580-1665 AD (Maruti Rebellion)
- The Gelgel kingdom began to decline during the reign of Dalem Bekung (1550-1580 AD) due to the emergence of rebellions. After these uprisings were quelled, Dalem Anom Segening was appointed to rule from 1580 to 1665 AD. In 1665 AD, Ida Dalem Pemayun ascended the throne and appointed several patih, which led to protests and dissatisfaction among various factions. That same year, the kingdom was ruled by I Dewa Dimade, but shortly after, Kriyan Maruti rebelled and seized power from Ida Dalem Dimade.
- 298 6. 1686-1704 AD (Maruti II Rebellion)
- 299After ascending the throne, Ida I Dewa Dimade faced a rebellion and died in exile (1686 AD). I Gusti Agung Maruti300ruled (1686-1704 AD) but experienced regional instability. In 1704 AD, the sons of Ida Dalem Dimade and Ida Dalem301Anom Pemayun, together with the forces from Buleleng and Badung, attacked and captured Gelgel, leading to the302exile of I Gusti Agung Maruti.
- 303 7. 1710 AD (Building The Semarapura Kingdom)
- 304After the fall of Gelgel, Sri Agung Gede Jambe established Puri Semarapura north of Gelgel and was appointed as Ida I305Dewa Agung Jambe in 1710 AD in Semarajaya, Klungkung. I Gusti Lurah Abian Tubuh became a loyal servant. The title306"Dalem" was abolished and replaced with Ida I Dewa Agung. Gelgel remained a center of history, religion, and307Balinese culture.
- 308 8. 1841 (Signing of The Cooperation Agreement with The Dutch)
- 309Under the rule of Dewa Agung Putra II, the Klungkung kingdom established a good relationship with the Dutch trading
company. After the agreement with Badung, Huskus Koopman approached Dewa Agung Putra II for cooperation, with
the assistance of Made Lange, a Danish trader. His efforts were successful, and in December 1841, Dewa Agung Putra
312312II signed a peace treaty with the Dutch.
- 313 9. 1843 (Renewal of The Agreement with The Dutch)
- 314On May 24, 1843, the agreement between the Klungkung kingdom and the Dutch was renewed, resulting in a315reduction of Klungkung's sovereignty. Dewa Agung Putra II was required to abolish the Law of Tawan Karang, which316allowed the kingdom to seize the contents of ships that were stranded in its territory. The awareness of the potential317threats posed by the contents of this agreement made the royal officials feel dissatisfied.
- 318 10. 1903 (The Decline of The Klungkung Kingdom)
- 319After the peace treaty, Dewa Agung Putra II lost his prominence and died a year later. He was succeeded by Dewa320Agung Putra III, who was ambitious to restore power but died in 1903 before his ambitions were realized. The throne321then fell to Dewa Agung Jambe II, who was more conciliatory and avoided confrontation with the Dutch. After the322Puputan Badung in 1906, the Dutch requested the king of Klungkung to sign a new agreement.
- 323 11. 1908 (Puputan Klungkung)
- The new agreement signed by Dewa Agung Jambe II sparked unrest in Klungkung, inviting a military invasion by the Dutch. On April 28, 1908, the Puputan Klungkung occurred, resulting in the death of the king and his entourage. From that point on, Klungkung was occupied by the colonial government. In 1929, Dewa Agung Oka Geg was appointed by

327 the Dutch as the head of the Klungkung principality and ruled until the era of independence, when various 328 principalities in the Indonesian archipelago were abolished.

329 12. The History of Kamasan Village as a Craft Village

330 Kamasan, or Ka-emas-an, is an ancient community in Bali known for its goldsmithing (pande mas) skills. Archaeological 331 finds such as stone thrones and monoliths indicate that this community has a long history, rooted in megalithic 332 traditions and pre-Hindu life since the Neolithic period. Since the Gelgel kingdom, the Pande were increasingly 333 recognized by the king, producing metal carving art and wayang painting used in the decoration of temples and 334 palaces. Under the rule of Dalam Waturenggong (1460-1550), Kamasan became known as a thriving artisan village, 335 with banjars such as Sanggiang and Pande Mas serving as working groups for artisans. The art of wayang kulit painting 336 developed during the Majapahit kingdom, and Bali reached its peak of glory under the Kepakisan Dynasty. Today, 337 Kamasan's artistic products, including copper and brass carvings, are highly sought after by tourists and the art 338 market, supporting the local economy.

339 13. The History of The Islamic Village of Gelgel

340During the reign of Dalem Ketut Ngelesir as King of Gelgel I (1380-1460), the King of Bali made a visit to the Majapahit341Palace when King Hayam Wuruk held a conference of kingdoms throughout the archipelago. Upon his return to Bali,342Dalem Ketut Ngelesir was accompanied by 40 attendants from the Islamic Majapahit kingdom. Upon arriving in Bali,343these 40 attendants were given land or gifts in the Gelgel area. Some of these attendants returned to Java, some went344to the eastern part, and some settled in Gelgel, where they remain to this day.

345346 4.2 SWOT Approach as a Marketing Strategy for Cultural Tourism in Klungkung Regency

Based on the strategic plan of the Klungkung Regency Tourism Office for the period 2018-2023, Klungkung is expected to become a competitive tourist destination. Therefore, efforts are needed to develop tourism and cultural potential to enhance the attractiveness of Klungkung Regency. In this regard, it is necessary to identify and analyse the internal strategic environment to understand its strengths and weaknesses. Additionally, to anticipate problems and external threats that hinder tourism development and marketing, it is essential to identify and analyse the external strategic environment to assess threats and opportunities. A SWOT analysis will assist in generating strategies focused on developing a tourist destination and formulating its marketing strategy based on several formulated strategic options.

Table 3, Tabulation of SWOT Analysis

360 4.3 SWOT Quadrant

The next step is to determine the marketing performance position that is ideal to implement alternative strategies effectively. The IFE matrix is placed on the horizontal axis, while the EFE matrix is placed on the vertical axis (David Fred, 2017). The IE matrix consists of three sections, each having different strategic implications:

- 364 1. Cells I, II, IV can implement growth and development strategies.
- Cells I, V, VII can implement strategies that prioritize maintenance and protection.

- 366 3. Cells VI, VIII, IX can implement strategies that prioritize divestment.
- The Internal-External Matrix (IE) is used to analyze internal and external factors to assess the organizational position. In the context of tourism marketing based on history and culture in Klungkung Regency, Gelgel Village, Kamasan Village, and Semarapura City are identified as follows:
- 1. Internal-External Matrix (IE): A score of (3.98) indicates that the marketing strategy has a strong potential for growth.
- 371 2. High-Growth Quadrant: A score of (4.00) suggests that the tourism marketing strategy is in a strong position,
 372 emphasizing the need for further strengthening and development of the strategy.
- 373
 3. Strategic Implications: The development strategy is focused on leveraging internal strengths such as cultural heritage
 374 and historical significance to enhance the tourism sector. Factors influencing this include the cultural and historical
 375 narrative, community involvement, and effective storytelling in tourism. The IE analysis can aid in determining the
- 376 most effective strategies to be implemented.

377

379 4.4 SWOT Matrix Approach

The next step is to create EFAS (External Factors Analysis Summary) and IFAS (Internal Factors Analysis Summary) using a SWOT Matrix to outline storynomic as a marketing strategy based on history and culture in Klungkung Regency. EFAS: Identify external opportunities and threats related to cultural tourism, IFAS: Assess internal strengths and weaknesses of the tourism sector. The strategies of SWOT are: SO Strategy: Leverage strengths to capitalize on opportunities in strategic, ST Strategy: Use strengths to mitigate external threats, WO Strategy: Address weaknesses to take advantage of cultural opportunities, WT Strategy: Minimize weaknesses and avoid threats. This framework aids in developing a focused marketing strategy for historical and cultural tourism in Klungkung.

408

417

418

419

421

422

401 4.5.1 Hierarchy 1 Purpose

402 Determine the objectives of the Strength-Opportunity (SO) strategy priorities to support the development of historical and 403 cultural-based tourism. The combined SWOT and AHP method is used to analyze and find the best strategy to increase 404 strategy productivity in the company (Pradipta, 2019). The SWOT matrix was selected by evaluating the weights of various 405 criteria as part of the design of the strategy selected using AHP. The determination of the weight of each factor of the 406 SWOT strategy then compiles a pair comparison to determine the level of importance of each alternative strategy using 407 Super Decision Software (Pradipta, 2019)

409 4.5.2 Hierarchy 2 Criterion

410 Below are the implementation and recommendation based on the priority elements of Hierarchy Criterion:

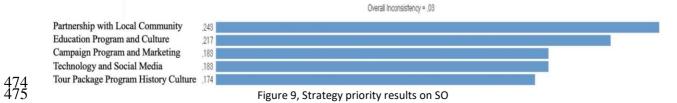

- 411 1. Education
- 412 a) Strategy: Raising awareness and understanding of historical and cultural heritage.
- b) Implementation: Organizing seminars, festivals, and campaigns on cultural preservation, Including history and cultural education programs, Promotion of museums, historical sites, and chronology of royal history in Klungkung.

416 2. Economics

- a) Strategy: Increase local economic impact through tourism development.
- b) Implementation: Integrate MSMEs and local artisans (e.g. Kamasan Village and Gelgel Village) in tourism activities. Organizing arts-culture festivals that support the local creative economy.
- 420 3. Infrastructure
 - a) Strategy: Improve tourism facilities such as transportation, accommodation, toilets, parking lots, and other facilities.
- b) Implementation: Providing adequate parking spaces in Kamasan Village, Adding and improving tourism-standard
 toilet facilities in locations such as Kerta Gosa, Developing accommodations, restaurants, and tourist information
 centers.
- 426 4. Technology 427 a) Strateg
 - a) Strategy: Leverage digital technology for marketing and travel experiences.

428 429 430 431		D) Implementation: Managing the official website of tourist destinations (e.g. www.dispar.klungkungkab.go.id) for detailed information, Using social media (Instagram, TikTok, Facebook) for visual-interactive promotion Collaborating with influencers and bloggers to increase exposure, Developing AR/VR technology for futur interactive historical tourism experiences, Using data-driven marketing to understand travelers' preferences.
432	5.	
433	5.	Human Resources (HR) a) Strategy: Improve the quality of tourism human resources.
434		 a) Strategy: Improve the quality of tourism human resources. b) Implementation: Training for tour guides and local tourism actors, Fostering communities to support sustainable
435		tourism and preserve culture.
436	6.	History and Culture
437	0.	a) Strategy: Leverage history and culture as the main attraction of the destination.
438		b) Implementation: Strengthen the historical narrative at tourist sites such as Kerta Gosa, develop historical an
439		cultural tour packages to attract tourists.
440	7.	Partnerships and Cooperation
441		a) Strategy: Build partnerships with local governments, local communities, business actors, media, academics, an
442		tourism organizations.
443		b) Implementation: Organizing city tours and promoting them through travel agents, websites, and social media
444		Organizing the Semarapura Festival (April 28 - May 1) to promote local cultural and economic potentia
445		Collaboration with universities for human resource training, market research, and development of assiste
446		villages.
447		
448		ioritizing the above elements using AHP, the marketing strategy of tourism destinations in Klungkung Regency can b
449		d out in a structured and effective manner. These elements complement each other to provide an engaging
450	edu	ational, and sustainable experience for tourists, while supporting local economic growth and cultural preservation.
451		
452	4.5.	
453 454		tages of a historical and cultural-based tourism marketing strategy in Klungkung Regency are summarized in thre rchies:
455 456	1.	Hierarchy 1 (Goal): Determine the objectives of the (SO) strategy priorities to support the development of historica and cultural-based tourism.
457	2.	Hierarchy 2 (Priority Criteria): Considers factors such as Education, Economy, Infrastructure, Technology, Huma
458		Resources, Cultural History, Partnerships, and Cooperation from the SWOT matrix.
459	3.	Hierarchy 3 (Alternative Programs): Designing programs based on data and informant input, such as:
460		a) Marketing Campaign Program: Promotion of historical and cultural values through social media, city tour
461		workshops, cultural festivals, and collaborations with influencers.
462		b) Partnership Program with Local Communities: Involving local communities in tourism management throug
463		training, development of tour packages, and cultural events such as the Semarapura Festival.
464		c) Cultural Education and Understanding Program: Art workshops, historical tourism routes, school education, an
465		cultural preservation and historical sites.
466		d) Promotion through Technology and Social Media: Create creative content, collaborate with influencers, an
467		leverage social media such as Instagram and TikTok.
468		e) Historical and Cultural Tour Packages: Arrange thematic tour packages to historical sites such as Puri Agun
469		Semarapura, Kerta Gosa, and Gelgel Village, with Klungkung art and culinary performances.
470		nain focus is on the implementation of sustainable programs to promote the historical and cultural heritage of
471	Klur	kung
472	_	
473	Res	ts of Strategy Prioritization Based on All Criteria in the Strength Opportunities (SO) Marketing Strategy

Combined instance - Synthesis with respect to: Goal: Prioritas strategi Strenght-Opportunity (SO)

476 Based on the figure above, the priority of the program strategy with the highest vector eigenvalue was obtained, namely 477 the strategy of cooperation with the local community, which was 0.248, Value consistency ratio in the overall pairing 478 comparison was 0.03. This value states that the assessment of the paired comparison as a whole process that has been 479 carried out is acceptable and considered consistent because it has met the requirements of the consistency ratio i.e. less 480 than or equal to 0.1(Saaty, 1993). Local communities such as Gelgel Village, Kamasan Village and Semarapura city have in-481 depth knowledge of unique local history, culture and traditions. Involving them in the development of a tourism marketing 482 strategy will help ensure the authenticity and accuracy of the information conveyed to tourists. Gelgel Village with the 483 historical potential of the Gelgel Kingdom, Kamasan Village with its traditional crafts and Semarapura with Kertha Gosa are 484 cultural heritages that need to be preserved. The concept of Storynomic Tourism emphasizes storytelling and experiences 485 that involve the local community. By telling the unique stories of the Gelgel kingdom, Kamasan Crafts and the beauty of 486 Kertha Gosa, tourism destinations can attract tourists in a more profound and meaningful way.

487

495

488 The second priority of the strategy is education and cultural programs, this is important to increase tourists' understanding 489 of the history and culture of tourist destinations, so that tourists can learn about cultural heritage and history in tourist 490 destinations. Marketing campaigns and social media technology have the same priority, as both have the potential to reach 491 a wider audience actively. It's important to remember that cultural and historical tour packages also have a very important 492 role in providing a well-rounded experience for tourists. Therefore, it is important to integrate all of these elements in a 493 balanced way in a tourism marketing strategy so that historical and cultural tourism destinations can attract tourists, 494 provide a memorable experience, and have a positive impact on the local community.

496 5. Conclusion

497 The conclusion of this research article is that Storynomic's approach in tourism marketing can significantly improve the 498 attractiveness and sustainability of tourism in Klungkung Regency, Bali. This research highlights the importance of using 499 cultural and historical stories in promoting tourist destinations, as well as the need for collaboration between various 500 stakeholders. Although Klungkung has a rich history and culture, challenges in marketing and managing destinations 501 remain. Therefore, an effective marketing strategy must include improving infrastructure, using information technology, 502 and educational programs to increase public awareness and tourists. By integrating historical and cultural aspects into 503 tourism, it is hoped that a more immersive and engaging tourist experience can be created for visitors. This research also 504 emphasizes the importance of local economic development and improving human resources to support sustainable 505 tourism. Thus, the Storynomic approach is expected to make a significant contribution to the development of a more 506 effective marketing strategy and make Klungkung Regency a tourist destination worth visiting.

508 Limitation and Future Research 6.

509 The limitation of this study is that the available data does not cover all storynomic impacts in Klungkung, the results of this 510 study may not necessarily be widely applicable to other regions due to differences in cultural context. As for the next 511 research, quantitative analysis can be used in the analysis by considering variables and indicators in storynomic tourism. 512 The next thing is to develop a more comprehensive storynomic model by conducting similar research in other areas as 513 comparative effectiveness.
