Reviewer's Comment for Publication.

(To be published with the manuscript in the journal)

The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.

Inguinal hernioplasty is a surgical procedure to repair an inguinal hernia, a bulge in the groin area.

Detailed Reviewer's Report

- Ketorolac is a nonsteroidal anti-inflammatory drug used for the short term treatment of moderate to severe pain, typically after surgery.**
- It works by inhibiting the body's production of substances that cause pain, fever and inflammation.**
