Reviewer's Comment for Publication.

(To be published with the manuscript in the journal)

The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.

Stem cells are a special type of cells that have two important properties. They are able to make more cells like themselves.

Detailed Reviewer's Report

- 1. Stem cells are found in almost all tissues of the body.**
- 2. Stem cell research in cancer focuses on two main areas. Using stem cells to treat cancer and studying cancer stem cells to understand and potentially target cancer.**
- 3. Stem cell transplants can restore blood cell production after cancer treatments and in some cases like leukemia can directly target cancer cells.**

International Journal of Advanced Research

Publisher's Name: Jana Publication and Research LLP

REVIEWER'S REPORT

- 4. Additionally research into CSCs which are thought to drive tumor growth and relapse, aims to develop new therapies that specifically target these cells.**
- 5. Given all informations are good with meaningful.**
- 6. But there is no separate part of results and discussion part.**
- 7. Key words must be given.**
- 8. Summary part should be included.**
- 9. Seems like given theoretical review. It should be given with above flow.**
- 10. References should be in alphabetical order.**
- 11. After some corrections can be published in your journal.**
