Reviewer's Comment for Publication.

(To be published with the manuscript in the journal)

The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.

Cervicofacial is a medical adjective meaning of or relating to the neck and face. It can describe a condition like cervicofacial actinomycosis or a surgical technique such as a cervicofacial flap, a type of skin graft used for reconstruction in the head and neck region.

Detailed Reviewer's Report

- 1. Myeloid sarcoma is a rare and fast growing hematological malignancy that occurs when immature myeloid cells form a solid tumor outside of the bone marrow.**
- 2. It is often associated with acute myeloid leukemia but can also be linked to other conditions.**

REVIEWER'S REPORT

- 3. Myeloid sarcoma can affect many organs and tissues, including the skin, lymph nodes testicles, and gastrointestinal tract.**
- 4. Leukemia is caused by DNA mutations in bone marrow cells that lead to the uncontrolled production of abnormal white blood cells, though the specific cause of these mutations is often unknown.**
- 5. A fatal prognosis refers to a medical prediction that a patient is likely to die from their current illness or condition.**
- 6. It indicates that the disease has progressed to an advanced and irreversible stage, and that there is no known cure or effective treatment available.**
- 7. This research is medically very valued one to explore many about this topic.**
- 8. Abstract given good and key words also understandable. But very less information. It is not sufficient to publish. If possible can be added more points.**
- 9. Results part and discussion part need to be added more.**
- 10. Summary points must be included.**
- 11. References should be in alphabetical order.**
- 12. After those corrections can be published in your journal.**
