Reviewer's Comment for Publication.

(To be published with the manuscript in the journal)

The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.

Laryngeal cancer is a treatable head and neck cancer that develops in the larynx, or voice box, and can affect the vocal cords. It is more common men and is a significant global health concern.

Detailed Reviewer's Report

1. Young adults typically aged 18-25, are in a transitional period from adolescence to full adulthood, marked by significant changes in independence, education, career, relationships, and identity.
2. This stage involves increased personal responsibility and independence from family. While often a time of growth, it also

REVIEWER'S REPORT

presents challenges, including navigating new stressors, forming identity and managing health and financial situations.

3. Squamous cell carcinoma is a type of skin cancer that develops in the squamous cells, which are flat cells that line the surface of the skin and mucous membranes.
4. Radiotherapy also known as radiation therapy, is a medical treatment that uses high-energy radiation to kill cancer cells or shrink tumors.
5. Chemoradiotherapy is a cancer treatment that combines chemotherapy and radiotherapy. It is used to treat certain types of cancer, such as head and neck cancer, lung cancer and cervical cancer.
6. Abstract with key words are given good.
7. In results part can be made tables for data. Pie chart is good to see the results.
8. Summary points can be included.
9. References should be in alphabetical order.
10. After the small corrections can be published in your journal.
