REVIEWER'S REPORT

The manuscript is well-written and scientifically sound. The objectives are clear, the methods are appropriate, and the results are well presented. References are sufficient and updated, with language suitable for academic publication. No ethical or competing interest issues are identified. Minor improvements in clarity and the inclusion of recent citations are suggested to further strengthen the work.

Minor Corrections:

- Improve clarity in a few sentences of the abstract.
- Add 2–3 recent references to strengthen the discussion.
- Correct minor grammatical and formatting issues.
