Reviewer's Comment for Publication.

This case report provides valuable insight into Ayurvedic management of tubal infertility, combining traditional therapies with modern diagnostic assessment. The manuscript is well-structured, with a clear presentation of patient history, clinical findings, treatment procedures, and outcomes. It effectively illustrates the potential role of Basti therapies and herbal formulations in restoring tubal patency.

Strengths:

- Comprehensive patient assessment using both modern and Ayurvedic diagnostic criteria.
- Detailed description of Basti procedures and oral medications, with rationale linked to Ayurvedic principles.
- Clear documentation of treatment timeline and follow-up, including HSG findings and confirmed conception.
- Highlights a non-invasive, cost-effective alternative to ART in selected cases.
- Supports integration of traditional and modern approaches in reproductive health management.

Overall

This manuscript contributes valuable clinical insights into Ayurvedic management of tubal infertility. After minor revisions to improve language clarity, figure/table presentation, and discussion of limitations, it is suitable for publication.

Recommendation:
