Accept after major revision .....

Do not accept (*Reasons below*) .....

Rating	Excel.	Good	Fair	Poor
Originality		Good		
Techn. Quality		Good		
Clarity		Good		
Significance	Excellent			

Reviewer Name: Dr.Sumathi

Date: 29/9/2025

### *Detailed Reviewer's Report*

1. Infertility is the inability to get pregnant after at least one year of regular unprotected intercourse. It can also refer to the inability of a women to carry a pregnancy to term.
2. Tubal blockage refers to a condition where the fallopian tubes, which connect the ovaries to the uterus, become blocked. This blockage prevents the egg from traveling to the uterus and the sperm from reaching the egg, resulting in infertility.
3. Anovulation is a condition that disrupts the normal monthly release of an egg from the ovary during a menstrual cycle. It is a common cause of infertility in women worldwide.
4. Anovulation can be caused by a variety of conditions, including hormonal imbalances, endocrine abnormalities or issues with the ovary itself.
5. Reproductive health refers to the physical, mental and social well being of individuals in relation to their reproductive systems and sexual health.
6. Key words and abstract are given good with meaningful.
