### Reviewer's Comment for Publication:

The manuscript provides an insightful semantic and pragmatic analysis of poster texts prohibiting garbage disposal in Palu City, emphasizing illocutionary speech acts and their social impact. The study is original, relevant, and supported by real data, making a valuable contribution to applied linguistics and environmental communication. However, minor revisions are required to improve clarity, streamline repetitive sections, standardize reference formatting, and strengthen the presentation of findings (e.g., through summary tables). With these improvements, the paper will be suitable for publication.
