Reviewer's Comment for Publication

The paper titled “*The Link between Swedavaha Srotas and Jwara: A Comprehensive Study*” provides an insightful conceptual exploration of Ayurvedic physiology, connecting the role of **Swedavaha Srotas** with the manifestation and management of **Jwara (fever)**. The author has effectively combined classical Ayurvedic references with modern physiological understanding, creating an integrative perspective that enriches current Ayurvedic scholarship.

Strengths

- The study demonstrates **strong theoretical grounding** in classical Ayurvedic texts such as *Charaka Samhita*, *Sushruta Samhita*, and *Ashtanga Hridaya*.
- It successfully establishes a **logical correlation** between *Swedavaha Srotas Dushti* and *Jwara Roga*, emphasizing physiological and pathological interdependence.
- The integration of **modern biomedical perspectives** (thermoregulation, hypothalamic control, and sweating mechanisms) adds depth and interdisciplinary value.
- The **organization and coherence** between sections—concept, pathology, management, and modern parallels—enhance readability and scholarly clarity.

REVIEWER'S REPORT

Areas for Minor Revision

1. Language and Formatting:

- Improve sentence flow and consistency (e.g., "To studyand understand" → "To study and understand").
- Ensure consistent spacing after punctuation and between paragraphs.
- Use uniform capitalization for Ayurvedic terms (*Jwara*, *Swedavaha Srotas*, *Pitta Dosh*a, etc.).

2. Abstract:

- The abstract is informative but can be shortened slightly to enhance clarity and impact.
- Use clear subheadings or concise transitions between objectives and findings.

3. Tables and Headings:

- Ensure proper numbering sequence (e.g., Table 3 missing).
- Label all tables clearly with concise captions (e.g., "Comparison of Nidana of Jwara and Swedavaha Srotas Dushti").

4. References:

- Maintain consistency in reference style (e.g., spacing before/after author names, ensure uniform use of "Vol-2," "Vol. 2," etc.).
- Verify recent publication years and correct minor typographical errors in entries (e.g., unnecessary parentheses).

5. Discussion and Conclusion:

- The discussion is strong; however, a short concluding paragraph summarizing key findings and future scope (e.g., relevance for integrative medicine research) would enhance closure.

6. Grammar:

- A few lines need editing for grammar and clarity (e.g., "They form an essential system for maintaining the balance of body temperature..." could be simplified).

Overall Evaluation

The manuscript makes a **valuable theoretical contribution** to Ayurvedic physiology and pathophysiology. Its comparative and analytical approach enriches understanding of the Swedavaha Srotas–Jwara relationship and successfully bridges classical concepts with modern
