Reviewer Name: **Dr. Kavya Boini**

Strengths:

- 1. Clear objective:** The study's objective is well-defined and focused on evaluating awareness and acceptance of periodontal disease and therapy among patients.
- 2. Relevant topic:** It is a significant public health concern and understanding patient awareness and acceptance is crucial for effective management.
- 3. Methodology:** It is clearly explained with more details including type of study design, data collection and data analysis.
- 4. Exploration of barriers:** The study tried to explore the barriers to awareness and acceptance of periodontal disease and therapy in more depth with the help of statistics and previous research studies.

Conclusion:

The findings of the study highlight the need for patient education programs and awareness initiatives to improve the management of periodontal disease. Further studies should aim to build on these findings and explore the topic further.
