Reviewer's Comment for Publication

The manuscript presents a comprehensive and well-structured analysis of India's evolving defense modernization framework, focusing on the Sudarshan Chakra Mission as a pivotal step toward technological indigenization and futuristic warfare preparedness. The paper effectively situates the mission within the broader policy and strategic transformations of India's defense sector, supported by an extensive review of policy documents, expenditure data, and relevant scholarly works.

It demonstrates a high degree of originality and relevance by linking technological innovation with national security imperatives and geopolitical positioning. The integration of artificial intelligence, quantum technologies, and predictive warfare systems is presented with clarity, reflecting an in-depth understanding of emerging global defense trends. The discussion on strategic implications, including regional and global dimensions, further enriches the analysis.

Overall, the manuscript stands out for its analytical depth, structured argumentation, and clear linkage between policy evolution, technology, and national strategy. It contributes substantially to academic and policy-oriented discussions on defense innovation and India's position in the global military technology landscape.
