Rating	Excel.	Good	Fair	Poor
Originality		Good		
Techn. Quality	Excellent			
Clarity	Excellent			
Significance	Excellent			

Reviewer Name: Dr. Sumathi

Detailed Reviewer's Report

- 1. Intensive poultry farming is an industrial scale method of raising large numbers of birds in controlled, indoor environments to maximize production efficiency and minimize costs.**
- 2. It uses automated systems for feeding and watering and high stocking densities, allowing for a high volume of meat and eggs at low cost.**
- 3. Nutritional problems are health issues resulting from an imbalance in nutrient intake, which can be due to undernutrition. These problems can manifest as chronic diseases like heart disease, diabetes and obesity or as specific deficiencies causing conditions such as scurvy, rickets or goiter.**
- 4. Mineral sources can be divided into dietary sources, which are found in foods like fruits, vegetables, meat and dairy and non renewable sources from the earth, such as metallic and non metallic deposits.**
- 5. Feed raw materials are the components used to create animal feed, which include grains, protein meals, and supplements that provide essential nutrients like energy, protein, vitamins, and minerals.**
