Detailed Reviewer's Report

- 1. The parental role involves providing safe, nurturing environment through physical, emotional, and structural support to raise a child to be an independent, confident and caring adult.**
- 2. Key aspects include ensuring basic needs are met, modeling good values, and fostering social and emotional development by encouraging autonomy within reasonable limits.**
- 3. Enhancing developmental outcomes involves creating supportive relationships, using early intervention and providing opportunities for play.**
- 4. Stable responsive relationships with caregivers provide a foundation for resilience and are crucial for cognitive, emotional, and social growth.**
- 5. Early intervention programs and developmental screenings identify needs early and can improve communication, social skills and independence while play based learning fosters crucial skills and helps regulate stress.**

REVIEWER'S REPORT

6. The LIPP method is an acronym that can refer to several different things, most commonly the laser induced pressure wave propagation method for measuring space charges in insulating materials or a lifestyle intervention in preparation for pregnancy program for maternal health.
7. Key words must be needed.
8. Methodology and result parts are awesome with graphs.
9. Discussion part need more points with references.
10. Summary points should be included.
11. References should be in alphabetical order.
12. After those corrections good to publish in your journal.
