Reviewer's Comment for Publication:

This research aims to contribute to improving the quality of vocational training and the professional integration of young graduates in the craft sector in Benin, particularly in the municipality of Porto-Novo. This research paper discusses regarding the professional integration of young graduates, primarily those with a Vocational Qualification Certificate (CQM). The professional integration of graduates into the Beninese economy continues to face numerous obstacles, including a lack of opportunities, insufficient capital to establish a workshop, a shortage of professionals in certain trades, inadequate equipment, and a lack of specific, transferable skills. "Professional integration is a social process. Beninese economy, contributing between 10.6% and 13% to the Gross Domestic Product (GDP). The Vocational Qualification Certificate (CQM) thus replaces the apprenticeship completion certificates known as the Apprenticeship Completion Diploma, This research will help to define the actual situation of vocational training and the integration of CQM graduates in the craft sector in Benin, and particularly in Porto-Novo, in light of the reforms undertaken in recent years to improve the quality and competitiveness of the sector. the quality of a vocational training program depends on several conditions. The data collected revealed that although the CQM (Certificate of Qualification in Trades) is issued by the Ministry of Secondary Education, Technical and Vocational Training (MESFTP) to apprentices, some apprentices still have to hand it over to their employer, and it is only during a graduation ceremony that they officially receive their diploma.
