Rating	Excel.	Good	Fair	Poor
Originality		Good		
Techn. Quality		Good		
Clarity		Good		
Significance		Good		

Reviewer Name: Dr. Sumathi

Detailed Reviewer's Report

- 1. In medical terms occlusion means the blockage or closing off of a body passage, most commonly a blood vessel or a duct, preventing the normal flow of blood, fluids, or air often due to a clot, plaque, or other obstruction, leading to serious issues like heart attack, stroke or tissue damage. It can also refer to the alignment of teeth in dentistry.**
- 2. Intestinal occlusion, or intestinal obstruction is a blockage that prevents food, liquid, gas and stool from moving through the intestines.**
- 3. Symptoms include severe abdominal pain, cramping, bloating, vomiting and the inability to pass gas or stool.**
- 4. Common causes are adhesions from previous surgery, hernias, and cancer. Treatments depends on the cause but often involves surgery to relieve the blockage or a self expanding stent for certain types of cancer.**
- 5. Phagocytes are white blood cells that engulf and destroy foreign substances, including bacteria, viruses, fungi and cancer cells.**

REVIEWER'S REPORT

6. They are part of the body's innate immune system, which non specifically targets pathogens that have entered the body.
7. Pictures and informations are good. But there is no separate result and discussion parts are given. It should be needed.
8. Summary points also should be included.
9. References should be in alphabetical order.
10. After some corrections good to publish in your journal.
