Significance	Excellent			

Reviewer Name: Dr. Sumathi

Detailed Reviewer's Report

1. Digital competence is the confident, critical, and responsible ability to use digital technologies, encompassing skills, knowledge, and attitudes for tasks, problem-solving, communication, and creation in a digital world, covering everything from data literacy and safety to media use and content creation for learning, work, and societal participation.
2. Digital openness is the principle of making digital information, software, standards, and platforms freely accessible, usable, and interoperable, allowing for sharing, modification, and building upon them, which fosters innovation, transparency, and collaboration rather than restricting access through paywalls or proprietary locks.
3. It encompasses open-source software, open data, open education, and open standards, promoting a "default to open" approach for societal and economic benefits.
4. Interpreting results means analyzing raw data, numbers, or findings to find meaning, draw conclusions, and understand what they signify in the context of a study or question, often involving statistical

REVIEWER'S REPORT

analysis, comparing to previous research, identifying patterns, and explaining their relevance or implications. It's the step where you move beyond what you found to explain what it means for your research, hypotheses, or real-world application.

5. A public enterprise, also (SOE), is a business or organization that is owned, controlled, or operated by the government (national, state, or local) to provide essential goods or services, promote economic development, or serve public welfare, often operating on commercial principles but with social goals, such as utilities, transport, or telecommunications.
6. They aim to meet public needs, sometimes competing with private firms, and can range from full government ownership to partial stakes, with funding from public funds or revenue generation.
7. Key words are good can be added more.
8. Results part for tables should be given graphs.
9. Summary points can be added.
10. References should be added more.
11. After those changes good to publish in your journal.
