**Reviewer's Comment for Publication.**

*(To be published with the manuscript in the journal)*

*The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be displayed in the journal publication alongside with the reviewers name.*

Following observation needs to be incorporated:

- The abstract of the paper needs to be expanded and to be written in a more clear and precise manner. The number of keywords needs to be reduced to around 5.
- The paper should be written as the journals format.
- There are minor grammatical errors in the paper. The paper needs to be organised as it seems to be written in an unorganised manner.
- The referencing of the paper needs to be done as per the journals format. The referencing and sources in the images inserted as along.
- The parameters selected in the methodology stage needs to be elaborated further and their reasons should also be stated.

## REVIEWER'S REPORT

- The abstract of the paper needs to be written in a more technical manner highlighting the intent of the research and the number of keywords needs to be increased to 5.
- The images inserted in the paper should have clear significance and intent along with proper sources. The author can also include some tables and charts relevant to their research.
- The insert hand drawn images should be of higher resolution as in the current stage it is not visible. Also in the literature section instead of putting larger amount of text can it be reduced to matrix or tabular format when only the relevant data is highlighted.
- The referencing and in-line citation of the paper needs to be done as per the journal guidelines.
- Before the conclusion section there can be an discussion section which can elaborate on the results that were found through the process.
