Reviewer Name: Dr.Mithilesh kumar shukla**Reviewer's Comment for Publication:**

This study addresses a critical gap generally refers to an important or essential difference, deficiency, or shortfall that needs to be addressed to achieve a desired outcome. It is often used in various contexts such as business, education, healthcare, research, or technology by providing a deep qualitative analysis of the link between theoretical awareness and practical practices. Particularly it focuses on secondary education. Artificial intelligence (AI) is a revolutionary application at present era. For this study focused on four axes: theoretical perception of AI, practical classroom application, perceived obstacles, and required institutional support. In conclusion, fostering a successful AI-integrated environment requires a fundamental shift in educational management—moving away from traditional hardware provision toward building "Digital Learning Communities" and robust ethical frameworks.

Recommendation: Accept after minor revision ,***Detailed Reviewer's Report*****STRENGTHS:**

- 1- The importance of AI lies in adaptive learning and big data analysis.
- 2- AI integration improves teacher self-efficacy.
- 3- The study adhered to strict ethical protocols. And the findings of the qualitative analysis based on the participants' responses.
- 4- The thematic and quantitative analysis of the teachers' responses yielded the primary results.
- 5- utilizing tools like ChatGPT and Gemini, their efforts remain largely individual and hampered by systemic gaps.

WEAKNESSES:

- 1-Ethical Framework and usage AI ,there are two separate aspect.
