REVIEWER'S REPORT

Manuscript No.: IJAR-55884

Title: Peri-Implantitis Management: Current Therapies and Future Perspectives,

Recommendation:

Accept as it is
Accept after minor revision Yes
Accept after major revision
Do not accept (*Reasons below*).....

Rating	Excel.	Good	Fair	Poor
Originality	yes			
Techn. Quality		yes		
Clarity		yes		
Significance		yes		

Reviewer Name: Dr. Himanshu Gaur

Detailed Reviewer's Report

The manuscript provides a comprehensive narrative review of peri-implantitis, covering its etiology, diagnostic approaches, conventional non-surgical and surgical therapies, regenerative techniques, and emerging adjunctive strategies, and it is clinically relevant and generally well structured; however, several issues should be addressed before publication, including clearly stating the review methodology (search strategy, databases, time frame, keywords, and inclusion/exclusion criteria) to improve transparency and reproducibility, strengthening critical appraisal of cited studies rather than predominantly descriptive summaries, balancing the discussion of regenerative and novel therapies with more explicit limitations and levels of evidence, standardizing terminology and abbreviations throughout, correcting minor grammatical and formatting inconsistencies, improving figure/table clarity and referencing, and expanding the concluding section to more sharply synthesize clinical implications, research gaps, and future directions, as these revisions would enhance rigor, coherence, and the scholarly value of the review.
