Detailed Reviewer's Report

This research paper centered on parents of children with disabilities concerns regarding their children in the regular education schools through ascertaining whether the schools are adequately equipped in terms of special learning materials, teaching methods, assistive devices and physical provisions. It was initiated against the backdrop that little attention is placed on their views in relation to their children's placement in inclusive schools. In this paper the Abstract is written in a detailed format in which all things have been mentioned properly and also keywords are given properly. In the introduction part, the researcher has made link of introduction with the title and has given a detailed background effectively. Also, the research gap has been given properly. In addition to this, the Methodology is given in a proper way. Also research questions or objectives are given properly. In addition to this, Results are given properly and they are given with statistical proofs. Also there are educational implications, limitations and further suggestions given in this manuscript. Thus, this paper is accepted as it is.

Reason for Acceptance as it is

In this article, all things are good and with proper way. Abstract is written in good format with all important things such as sample, method, findings etc. In the introduction part, the researcher has made link for the title and has given background of study. Also research questions or objectives are given properly. In addition to this, Results are given with proper way and they are given with statistical proofs. Researcher has given discussion on results in detail with making comparisons. Also, further suggestions are given in this manuscript. Thus, this paper can be accepted as it is.

Abstract

Abstract is given in a proper way with all important things such as methods, sample, objectives, results etc. Also keywords are given that is must.

REVIEWER'S REPORT

Introduction

In the introduction part, the researcher has tried to link the introduction with the title and has given a detailed background with proper citations.

Methodology

Methodology is given in a proper way with research questions or objectives such as 1) What are parents' concerns regarding the availability of special learning materials and teaching methods for their children with disabilities in the regular education schools? 2) What are parents' concerns regarding the availability of physical provisions and assistive devices for their children with disabilities in the regular education schools?

Results

The result section is also given in a proper way in this manuscript. The findings are given in detail and with statistical proofs.

Discussion

The discussion section in this study is present in a detail. Also there has been made comparison of findings with findings of previous studies by the researcher. In addition to this, further suggestions have been provided by the researcher by which the validity of research papers increases and becomes more effective.

Conclusion

Overall the research paper is good and important, so this article can be accepted as it is.
