### Reviewer's Comment for Publication.

The study examines stress, coping strategies, and academic performance among undergraduate students. It is relevant and well-structured, with clear objectives and appropriate methodology. The findings are useful for improving student mental health support.

### Strength:

1. Relevant and socially important research topic.
2. Clear objectives and structured methodology.
3. Appropriate use of statistical analysis.
4. Practical implications for student mental health support.

### Weakness:

1. Clarify sampling technique and sample size justification.
2. Provide more detail about tools/scales used.
3. Improve clarity in statistical result presentation.
4. Minor grammatical and formatting corrections needed.

### Overall assessment:

The manuscript is well-written, relevant, and comprehensive. It effectively integrates family therapy models with the Indian context and highlights practical implications.

**Recommendation:** Manuscript accepted for publication .
