### Reviewer's Comment for Publication.

*(To be published with the manuscript in the journal)*

*The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be displayed in the journal publication alongside with the reviewers name.*

Following observation needs to be incorporated:

- The abstract of the paper needs to be concise down and should focus on what the paper intends to do.
- The current given keywords needs to be changed to be more aligned keywords as per the study
- There are minor grammatical errors in the paper which needs to be corrected.
- The paper needs to be organised as the prescribed journal's format and some section of literature needs to be reorganised.
- The images included should have proper sources mentioned. A brief introduction section also needs to be included before the background of the study section.
- The referencing of the paper needs to be done as per the journal format and guidelines.
- The methodology of the paper needs to clearly define the parameters of the study.

### Detailed Reviewer's Report

- The abstract of the paper needs to be concise down and should highlight what the author is intending to do and their contribution to the domain. The keywords also need to be changed as per that.
- The literature section (review of literature as termed by the author) and introduction section should have some connection which seems to be missing. Also the section titled Study Area needs to be shifted after methodology section.
- The current methodology provided needs to be reorganized and to be written in a more technical manner along with detail explanation of the parameters taken into consideration along with the justification.

## **REVIEWER'S REPORT**

- Another observations is the maps and the images provided, they should have proper sources (either the source or taken by the author) along with a proper caption intending the significance.
- The result sections needs to be expanded more where the author needs to highlight their observations that were derived from the analysis.
- The formatting of the paper needs to be done as per the journals guidelines. The results and findings sections needs to clearly mention what the author findings were and how they are related to the study from which the final observations needs to be written.
- The conclusion and recommendation part can be separated instead of overlapping with one another.
