### *Detailed Reviewer's Report*

*The title of the paper is relevant and important in the present context. The work is acceptable however it could have done more justice to the title. The author should focus and pay attention to the following points for future references:*

- *Language clarity, Grammar & sentence structure.*
- *Stay with the topic (as the topic is India focused but a lot of part in this paper is dedicated to other revolving factors. Had it paid more attention to India's role and its position, the paper would have been more justified)*
- *A little more detailed and explained content enhances the quality.*
