Abstract

Improvement and amendment of criminal persons and take them back to normal situation is one of the most important legal matters in society , people of the base of every society , so due to this problems society should attempt to solve this matters not just punish criminals and teach them the values of social matters. So it is necessary that by using all our power including mosques we prepare the society . We shouldn't reject the criminals, we should seek to QURAN verses and narratives we can see the view of ISLAM about this important matters. God considered mosques as the places to reach and getting close to God. The aim of this article is to introduce correct libraries methods and pay enough attention to the role of mosques to decrease the crime processes. According to this we can evaluate the role of mosques as a factor to amendment of crimes. And also society should use all the potentials.

Introduction

Performance of the society and amendment of criminal persons is one of the most important subject which require using all power , and tools in society to improve it . to access this aim we need mosques certainly , also mosques have very important role in improve this matters. Justice and related offices can not do this alone so we need mosques.

This survey is concern to our subject by descriptive-analysis methods. And library methods . we should pay attention to these 2 question :

- 1- What is the role of using the effect and potential of mosques specially in improvement of crime to do justice?.
- 2- What is the function of mosques in decrease the crime?

In this project assumption is that by presence of mosques and its function we can provide a good opportunity to make justice happen . and also the other hypothesis is recognizing the role of mosques to level the help the criminals.

1 – Definitions:

1 – 1 : lexical definition and amendment of crime

The word has some different meaning : guilty , sinner , sinful , sinner , wicked , and the equivalent of this in Persian is MOJREM(DEHKHODA DICTIONARY . COPY – 12 . page 17115).

The term of penalty means every person that do crime , or act against specific rules . (LANGRUDY,1390 . 618).

1- 2 lexical definition and term of justice

Justice means sobriety and just in whole : term of justice is resistance and religious meaning is act like rights . (1680 . HAMAN.).

Avoid from every SUPERFLUITY and WASTAGE in material matter and is also in spiritual matters . justice is about matters which we can divide into financial and justice (SOBHANI . 1381 . 14 .).

2 – Important of perform justice through mosques and pay attention to crime

We can look at the criminal persons and some people which cross the lines we know that they didn't take part in mosques „hence they count themselves free to do anything such as : murder , rape , robber , and " ISLAM determined specific rules about the range of life , since our prophet made the first mosque we should know that IMAM ALI (peace upon him) at KUFEH mosque surveyed the justice matters. SAHLEH mosque also is the other important mosque to do these process. Being lord of justice through help the criminals has an important role to decrease the crime and murder , the good point is that international society united made a decision in 19th December of 2001 changed some rules . (IBRHIMI . 1386) so we should recognize the role and important of the mosques to reach our specific goals .

3 – performance of mosques in amendment crime process

According to the ISLAM rules some of the related punishments from improve the crime to have a better life in society (ABHARY . 1377) said that justice in ISLAM can make changes in soul of people and by amendment of criminal we can remove the punishments. (MARASHI . 1379.). so the most important problem is the person so only by mosques we can improve the people from inside .

3-1: Mosques and improve crimes (protective , self confidence , honor improvement)

- Crime is originally comes from social , mental , and biological conditions , so certainly we must pay more attention to perform this process , and also mosques should by using of educational and training according to the holy book do these important to protect the criminal .

- 3-1-1: Improvement of self honor

- The most common reason from crimes is to this point . why ? because person feel that he or she has no worth in the society . so he or she act against the social worth. So it is necessary that mosques should perform according to the legal rights of people . its effective , valuable , (MAHDAVI . 1390 .) we should asking help the ISLAM rules do this process.

- 3 – 1 – 2 : improvement self control

- In doctrine of believed rules in religious there are so potential definition self control has very important role . worth system and spiritual point of view in all dimension of human life is acceptable . by regarding the never end life and after life for human and describing the effect of religious and afraid of god we can show respect to crime , on the other hand , application of these worth described in ISLAM . (SAJADI . 1385) .

- So we should by pay attention to this process and perform it and also pay attention to problems such as : god torture " promise land , effects of the materials , . . . to self control is important. Self control is the ability of changing some ethic rules , by external factors,(MAHDAVI . 1390) .

- 3 – 2 mosques and improvement by therapy attitudes.

- As we mentioned above crime comes from mental , social , and biological reasons , some strict habits before do any crimes should be corrected. (RAHAMI 1381).

- Role of mosques in this aria can be very effective by therapy through participant of people. have the financial resources we can help this .

- 3 – 3

- Mosques and improvement crime by teaching approaches.

- Performance of mosques process in improvement crimes was a reason to improve the self honor and self control , on the other side of this problem provide the financial matters is not enough , not only we should provide the money , but also we should pay attention to the teaching process. At beginning of ISLAM mosques were the base places in different ways . prophet (peace upon him and his family) said: we shouldn't stay in mosques without any specific reason , but for 3 group : some person that read holy book after praying , people that worship the god. And some person which is teacher . (AMELI . 1389.) .

- So we can define mosques as base places for teaching and training matters. We can have some specific atmosphere in mosques make this important happen . we should pay more attention to this that designing religious discussion has much more goodness. In ISLAMIC society most of the people are tasked to learn and also teach religious in society , the aim of the process is reaching to the future and world life, especially in recognize the needs of people . (ILHAM . 1390 .) .

- Do the rules and also consider this matter that mosques can be as an important base place to reach our targets. Make familiar criminals with religious can be a good reason to training the peoples.

Conclusion

As the result showed, justice office cannot act against crime matters and improvement the criminal activity, we should use all of this resources in society. One of the most important resources is use the mosques as the best place

for reaching our purposes. Why some criminal act like this? Lack of money and economical matters also is important , so this is necessary we use the experts idea about this . We can help the society . also specially in ISLAMIC republic this is very worth.
